

The Energy Guardian® Attic Kits

Pull Down Ladder Cover

Two different kits that fit over any (spring based and folding) pull down ladder.

Some attics have trussed roof construction. In this case, there are support trusses that extend from the floor or floor joists up to the roof of the home. For attics with support trusses, order truss pull down kit. For most other attics, a standard pull down kit is needed. Each kit has an R-39 insulating value, revolutionary air seal and 20 year warranty. The kit is comprised of a lid and frame. The revolutionary air seal Hatch covers insulate and seal push up access panels of virtually all sizes while providing easy access to the attic.

is formed when the lid fits into the frame. The lid weighs approximately 10 lb. and the frame, which serves as a protective barrier, is less than 5 lb. Both can be moved when entering the attic.

You need to make a few measurements and note some things to make certain that you order the proper kit for your home.

For a non-trussed attic:

Fits all openings less than 62"

0270470 Model# PDS-09-HW

For additional 9" depth to frame.

0270471 Model# XFS-09-NW

For a trussed attic:

Fits all openings less than 62"

0270472 Model# PDT-09-HW

For additional 9" trussed frame depth.

0270473 Model# XFT-09-NW

Walk Up Stairway Cover Accessory

For each additional 31½" x 39" section. Accessory photo at right shown with 0270470 and two 0270475

0270475 Model# WUX-00-NB

Side Wall Panel

For openings less than 36" x 36"

0270490 Model# KWS-00-HB

For openings greater than 36" x 36", and less than 35" x 63"

0270491 Model# KWZ-00-HB

Speed Adhesive

0270493

Push Up Hatch Cover

For a Trussed Attic:

For openings less than 32" in length.

0270483 Model# HAT-10-HB

For an attic without trusses:

For:

24 OC FJ's, opening less than 32"

0270480 Model# HAS-10-HB

For:

16 OC FJ's, with opening 29" wide, OS

0270481 Model# HAZ-10-HB

This stair cover insulates and seals entire area above the walk up stairs while providing easy access to the attic. This creates an opening in the attic that is either rectangular or L shaped. Each kit comes with joist framing units.

For:

16 OC FJ's, with opening 28" wide, 3" high frame

0270482 Model# HAM-03-HB

For:

16 OC FJ's, with opening 28" wide, 10" high frame

0270484 Model# HAM-03-HB

Attic Tent

Insulates and seals, Folding attic stairs, Knee wall doors, Attic Scuttle Holes, and Full -size doors (up to 35" wide)

Available in the following sizes.
